

# EPS RECYCLED

## Rethinking sustainability

The environmentally friendly alternative with proven quality - resource-saving, efficient and ideal for sustainable projects.

### Your benefits in detail:

**100% recycled material**

Sustainable, resource-saving and ideal for the circular economy.

**66 % less CO<sub>2</sub> emissions**

Noticeably reduce your ecological footprint.

**Wide range of colour options**

Standard in white, available in other colours on request.

**Density up to 80g/l**

If a higher density is required, we will be happy to test this.

**Thermal conductivity**

Comparable thermal conductivity to conventional EPS.
