Foodstuffs

Machinery and appliances

Medical technology

Pharmaceutical

Tool design and construction – Precision is the measure of all things

Prototype construction

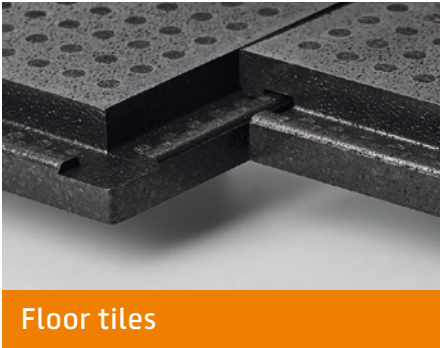

Moulds or Tools

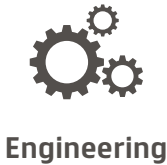

Subcontracting

Standard range – particle foam products

Services

Clear goals make work much easier.
We know that only the one, who is one
step faster, one step ahead and can
think and act unconventionally, can assert
themselves as the technological leader.

Taracell designs and manufactures innovative foam packaging. Flexible thinking and rapid execution are a feature of our daily lives. We have a bias for action and deliver exceptional packaging solutions using particle foam.
